DETAILED ACTION

Acknowledgment

1. Acknowledgment is made that applicant's Amendment, filed on 22 May 2003, has been entered. Upon entrance of Amendment, claims 25-39 were cancelled and claims 40-44 were added. Claims 40-44 are pending in the present application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 40-44 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claims 40-44 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: There is no

information recited within the claims connecting how a mechanism or chamber is positioned relative to one another in an excimer laser. Other omitted elements and structural cooperative relationships are the gas supply units, mirror(s), window(s), discharge electrodes, and the device(s) used to maintain the predetermined concentration of gas mixture.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

6. Claims 40-44 are rejected under 35 U.S.C. 102(e) as being anticipated by Hofmann et al. (6014398).

Art Unit: 2828

Regarding claim 40, Hofmann et al. disclose an excimer laser comprising a chamber device **10**, a gas mixture sealed in the chamber device **10**, the gas mixture being composed of a rare gas selected from the group consisting of Kr and Ar, a buffer gas of Ne, and a halogen gas, **see col. 9, lines 40-50 and claims 1, 2 and 5**; and means for carrying out pulse oscillation, **see col. 3, line 24-col. 4, line 67** in the chamber device **10** to excite the gas mixture to oscillate a pulsed laser; wherein a predetermined amount of Xe gas having a concentration of approximately 10 ppm is supplied to the gas mixture in the chamber device, **see abstract, col. 2, lines 25-43 and col. 10, lines 23-30**, whereby the chamber device **10** operates to maximize an output energy of the laser and minimize a dispersion of the output energy.

Regarding claims 41, Hofmann et al. disclose all the stated limitations, **see claims 1, 2 and 5**.

Regarding claims 42-44, it is inherent that the device disclosed by Hofmann et al. uses the method as claimed, therefore the method is rejected on the same basis as the device.

Response to Arguments

7. Applicant's arguments with respect to claims 25-39 have been considered but are moot in view of the cancellation of all those claims.
